

§ 95.115 Station inspection.

If an authorized FCC representative requests to inspect any station in a GMRS system, the licensee or station operator must make the station available. If an authorized FCC representative requests to inspect the GMRS system records (see § 95.113), the licensee must make them available.

§ 95.117 Where to contact the FCC.

(a) Write to:

The nearest FCC Field Office

(1) For application forms (see §§ 95.73 and 95.87);

(2) For instruction forms (see § 95.73);

(3) To complain about interference; or

(4) To find out if the FCC has type-accepted a certain transmitter for use in the GMRS (see § 95.129).

(b) Write to: Federal Communications Commission, Attention: GMRS, 1270 Fairfield Road, Gettysburg, PA 17325-7245.

(1) To ask a question about an application or about these Rules;

(2)-(3) [Reserved]

(4) To notify the FCC of a new name or mailing address (see § 95.103);

(5) [Reserved]

(6) To return a license to the FCC for cancellation (see §§ 95.103 and 95.107).

(7) [Reserved]

(c) [Reserved]

[48 FR 35237, Aug. 3, 1983, as amended at 53 FR 47717, Nov. 25, 1988; 55 FR 51909, Dec. 18, 1990]

§ 95.119 Station identification.

(a) Except as provided in paragraph (e) of this section, every station in a GMRS system and every mobile station unit must transmit a station identification:

(1) Following the transmission of communications or a series of communications; and

(2) Every 15 minutes during a long transmission.

(b) The station identification is the call sign assigned to:

(1) The GMRS system; or

(2) The station in the GMRS system transmitting communications.

(c) A unit number may be included after the call sign in the identification.

(d) The station identification must be clearly transmitted in:

(1) Voice in the English language, with each letter and digit separately and distinctly transmitted (letters may be said using a phonetic alphabet); or

(2) International Morse code telegraphy with a keyed tone (400 to 2,000 Hertz) between 8.34 and 20.85 baud (ten to twenty-five words per minute). The transmitted frequency deviation must be between 1,500 and 2,500 Hertz. Should delayed or periodic activation of automatic Morse code identification equipment interrupt the communications of another co-channel licensee, the Commission may require the use of equipment which will inhibit automatic station identification when co-channel communications are in progress.

(e) A station need not identify its transmissions if it automatically retransmits communications from another station which are properly identified.

§ 95.121 Transmitting channel.

Each station in a GMRS system must transmit only on the channel(s) or channel pair(s) (see §§ 95.7 and 95.29) printed on the license for that station, or authorized by these Rules for use by that station (see § 95.29 (e) and (f)).

[53 FR 47717, Nov. 25, 1988]

§ 95.123 Sharing a station or sharing equipment.

Every station in a GMRS system which is cooperatively shared (see § 95.33) must be managed by the licensee in accordance with the written agreement and in accordance with the provisions of § 95.33. Licensees sharing multiply licensed equipment must do so in accordance with the provisions of § 95.35.

§ 95.125 Station control point.

(a) Each station in a GMRS system must have a *control point* (where the station operator can perform the required duties (see § 95.173)).

(b) The control point for each station must be at that station, unless the license authorizes the station to be controlled from a remote point.
