

(e) If the license is no longer desired, it must be sent to the FCC (see § 95.117(b)(6)) with a written request that it be cancelled. (Forms 405–A or 574–R may be used for this purpose.)

[48 FR 35237, Aug. 3, 1983, as amended at 60 FR 50123, Sept. 28, 1995]

**§ 95.109 License not transferable.**

(a) The licensee must not transfer, assign, sell or give the license for a GMRS system to any other entity except in accordance with the provisions of § 95.111.

(b) If the licensee sells or gives away the GMRS system equipment, the new owner must obtain a new license before using it (see § 95.71), unless the new owner intends to use the equipment with an already licensed GMRS system.

**§ 95.111 Transfer of control of a corporation.**

If the licensee of a GMRS system is a corporation, and there is a change in the control of the corporation, the licensee must request consent for the change of control from the FCC by filling out Form 703 and sending it, together with the filing fee, to the address specified in the Wireless Telecommunications Bureau Fee Filing Guide. The FCC document granting such consent must be kept as part of the GMRS system records (see § 95.113).

[56 FR 51909, Dec. 18, 1990, as amended at 60 FR 50123, Sept. 28, 1995]

**§ 95.113 System records.**

(a) The licensee must keep records for the GMRS system for the license term (see § 95.105), except that the licensee need not keep authorizations which have expired.

(b) GMRS *system records* include the following documents (where applicable):

- (1) The license (see § 95.107);
- (2) [Reserved]
- (3) Copies of letters from the licensee to the FCC concerning name or mailing address changes (see § 95.103);
- (4) Copies of answers to discrepancy notices;
- (5) An STA or waiver of these rules;

(6) A copy of any renewal application submitted to the FCC and not yet acted upon (see § 95.89(b));

(7) A copy of the measurements and calculations (see appendix A) made during a control station power test (see § 95.47);

(8) A copy of a functional system diagram (see § 95.77);

(9) A copy of the agreement under which any station in the GMRS system is cooperatively shared (see § 95.33);

(10) A copy of the FCC consent to a licensee corporation's change in its corporate control (see § 95.111); and

(11) A temporary permit.

[48 FR 35237, Aug. 3, 1983, as amended at 53 FR 47717, Nov. 25, 1988]

**§ 95.115 Station inspection.**

If an authorized FCC representative requests to inspect any station in a GMRS system, the licensee or station operator must make the station available. If an authorized FCC representative requests to inspect the GMRS system records (see § 95.113), the licensee must make them available.

**§ 95.117 Where to contact the FCC.**

(a) Write to:

*The nearest FCC Field Office*

(1) For application forms (see §§ 95.73 and 95.87);

(2) For instruction forms (see § 95.73);

(3) To complain about interference;

or  
(4) To find out if the FCC has certificated a certain transmitter for use in the GMRS (see § 95.129).

(b) Write to: Federal Communications Commission, Attention: GMRS, 1270 Fairfield Road, Gettysburg, PA 17325–7245.

(1) To ask a question about an application or about these Rules;

(2)–(3) [Reserved]

(4) To notify the FCC of a new name or mailing address (see § 95.103);

(5) [Reserved]

(6) To return a license to the FCC for cancellation (see §§ 95.103 and 95.107).

(7) [Reserved]

(c) [Reserved]

[48 FR 35237, Aug. 3, 1983, as amended at 53 FR 47717, Nov. 25, 1988; 55 FR 51909, Dec. 18, 1990; 63 FR 36610, July 7, 1998]

EFFECTIVE DATE NOTE: At 63 FR 36610, July 7, 1998, §95.117, paragraph (a)(4) was amended by removing the term "type-accepted" and adding in its place "certificated", effective Oct. 5, 1998.

**§95.119 Station identification.**

(a) Except as provided in paragraph (e) of this section, every station in a GMRS system and every mobile station unit must transmit a station identification:

(1) Following the transmission of communications or a series of communications; and

(2) Every 15 minutes during a long transmission.

(b) The station identification is the call sign assigned to:

(1) The GMRS system; or

(2) The station in the GMRS system transmitting communications.

(c) A unit number may be included after the call sign in the identification.

(d) The station identification must be clearly transmitted in:

(1) Voice in the English language, with each letter and digit separately and distinctly transmitted (letters may be said using a phonetic alphabet); or

(2) International Morse code telegraphy with a keyed tone (400 to 2,000 Hertz) between 8.34 and 20.85 baud (ten to twenty-five words per minute). The transmitted frequency deviation must be between 1,500 and 2,500 Hertz. Should delayed or periodic activation of automatic Morse code identification equipment interrupt the communications of another co-channel licensee, the Commission may require the use of equipment which will inhibit automatic station identification when co-channel communications are in progress.

(e) A station need not identify its transmissions if it automatically retransmits communications from another station which are properly identified.

**§95.121 Transmitting channel.**

Each station in a GMRS system must transmit only on the channel(s) or channel pair(s) (see §§95.7 and 95.29) printed on the license for that station, or authorized by these Rules for use by that station (see §95.29 (e) and (f)).

[53 FR 47717, Nov. 25, 1988]

**§95.123 Sharing a station or sharing equipment.**

Every station in a GMRS system which is cooperatively shared (see §95.33) must be managed by the licensee in accordance with the written agreement and in accordance with the provisions of §95.33. Licensees sharing multiply licensed equipment must do so in accordance with the provisions of §95.35.

**§95.125 Station control point.**

(a) Each station in a GMRS system must have a *control point* (where the station operator can perform the required duties (see §95.173)).

(b) The control point for each station must be at that station, unless the license authorizes the station to be controlled from a remote point.

**§95.127 Controlling a station from a remote point.**

(a) A station operator in a GMRS system may control the station from a remote point through a *control link* (a connection between the remote control point and the remotely controlled station). The control link must be either:

(1) A wireline control link solely for purposes of transmitter control (see §95.181(i)(13)); or

(2) A radio control link.

(b) The remotely controlled station must not make unauthorized transmissions.

(c) The station operator must perform the required duties (see §95.173) when controlling the station from a remote point the same as when controlling it locally at the station point. Should the control link fail to function so that the station operator cannot perform the required duties, the remotely controlled station must not transmit.

(d) The FCC does not consider a station in a GMRS system as being remotely controlled if the connection is a wireline or mechanical control link, and the station and its control point are both:

(1) On the same vehicle; or

(2) At the same street address, or within 152 meters (500 feet) of each other.

(e) Any device used to establish a wireline control link which is attached
